### Employee Training System:

Three authority levels: admin, manager, employee.

Manager can add, modify employees, see the results of quizzes employees did

Employees can login to do courses and write quizzes.

Use local computer as host. Then in browser, type in localhost:3000/

Git clone the url

rails s, install needed bundles

should configure the mysql databases first.

rails [db:reset](#) to reset the local computer's mysql databases

rails [db:migrate](#)

rails [db:seed](#) to save the pre-saved files in mysql

manager account: [daniel@gmail.com](#) password:123456

admin: [admin@gmail.com](#) password: foobar

employees: peter/haoyu/hanxi/changyu/jiahe @gmail.com password:123456
